## Rural Outreach Program

---

Beginning in October 2009, our office is launching a rural outreach program seeking to connect working class immigrants with immigrant legal services. Our studies and experience have shown that there is no meaningful access to immigrant legal services in Eastern or Central Oregon.

The project has two components. First, we have created a permanent office in The Dalles to service immigrants in Eastern and Central Oregon. A full range of immigrant legal services is available at the The Dalles office – this will reduce the distance for services substantially and increase the affordability for individuals. The office will be staffed by bilingual immigration attorneys. Second, we will conduct outreach events at select sites throughout the region. The outreach events will provide orientation to common immigration questions and provide community preparation in the event of an ICE work-site raid or home-raid.
